

ELT Group participates in the 55th edition of the Paris International Air Show

Paris, 13 June 2025

ELT Group is participating in the 55th edition of the International Paris Air Show, which is taking place in Le Bourget, Paris, between 16 and 22 June (Hall 1 - E296). With seventy years of experience in the electromagnetic spectrum, combined with ongoing research and technological development, ELT Group's offerings are able to adapt quickly to changing operational requirements, including interoperability between systems, operational capability in all domains (including space and cyberspace), and new operational scenarios (system of systems).

Today, ELT Group is involved in several major international defence programmes, including the development of the sixth-generation GCAP fighter jet and sensors (ISANKE & ICS), a unique opportunity to achieve an unprecedented level of technology and industrial organisation. At the same time, in cooperation with Eurodass partners, upgrade of the Eurofighter Typhoon's self-protection systems continues. The aim is to support the extension of the platform's operational life and also make it a key asset in a future operational "System of Systems".

ELT Group develops Signals Intelligence (SIGINT) and EW capabilities on unmanned platforms, including surveillance and countermeasure payloads, as well as a ground component that is capable of preparing, executing and controlling the mission, also in cooperation with other assets (System of Systems).

In the space sector, following the launch of its first SCORPIO payload, the company continues to develop its technology roadmap focused on SIGINT solutions for collecting and managing data from satellite platforms, as well as solutions for protecting satellites and securing (including cyber security) data transmission between satellites and between satellites and ground stations. In this area, new developments include the SHARP system, designed for passive and continuous radio frequency monitoring, which can be installed on a HAPS (High Altitude Pseudo Satellite) platform.

ELT Group has developed solutions that synergistically integrate superiority in the electromagnetic spectrum with cyber superiority, to enable information superiority with the necessary level of protection from cyber attacks, in line with CEMA (Cyber Electro-Magnetic Activities) principles. This provides added value for operating in new scenarios that require a large exchange of information on the network, within a System of Systems environment.

ELT Group

For more than 70 years, it has been a world leader in Electronic Defence systems. Thanks to innovative management of the electromagnetic spectrum, achieved through proprietary and integrated technologies, today the brand is an international Group with a multi-domain approach that also covers Cyber, Space and Biodefense.

By the experience gained through participation in major European Defense programs including Eurofighter Typhoon, FREMM, PPA today ELT Group is present in more than 30 countries in the World with more than 3000 systems supplied, and also participates in the project for the sixth generation avionics platform GCAP (Global Combat Air Programme)

ELT Group is headquartered in Italy, but has a presence in 11 countries located on 4 continents through sales offices and companies of strategic importance and local law in Germany and Saudi Arabia.

Also part of the ELT Group are CY4GATE, which specializes in Cyber security and Cyber Intelligence, E4Life, Italy's first Biodefense company and Solynx Corporation, a US-based technology scouting company.
