

ELT Group on Board the Italian Navy's New DDG Destroyers

The new electronic warfare suite integrates advanced and innovative capabilities to protect both the platform and the naval force.

La Spezia, 24 September 2026 – Following the Prime contract signing between OCCAR and Orizzonte Sistemi Navali, ELT Group announces its contribution to the Italian Navy's new DDG Destroyers programme, developed through the collaboration of Fincantieri, Leonardo and MBDA. ELT Group will equip the future vessels with a next-generation electronic warfare suite designed to enhance the protection of both the platform and the entire naval force in increasingly complex, multi-domain operational scenarios.

The solution represents a significant capability advancement compared to previous architectures, introducing innovative technological features and a higher level of integration among sensors, countermeasures, and command-and-control systems. Its objective is to strengthen operational awareness and decision-making speed, enabling more effective management of the electromagnetic spectrum and a more timely response to emerging threats.

Through this programme, ELT Group further consolidates its role in the development of advanced electronic warfare capabilities for the naval domain, contributing to one of the most sophisticated and internationally significant military platforms of the future.

ELT GROUP

For 75 years, ELT Group has been a global leader in electronic defence systems. Through the innovative management of the electromagnetic spectrum, developed through proprietary and integrated technologies, the Group now operates with a multidomain approach that also includes Cyber, Space and Biodetection.

Building on the experience gained in major European defence programmes, including Eurofighter Typhoon, FREMM and PPA, ELT Group is present in more than 30 countries and has supplied over 3,000 systems. The Group also participates in the Global Combat Air Programme (GCAP) for the development of the sixth-generation avionics platform.

Headquartered in Italy, ELT Group is present in 15 countries across four continents through sales offices and strategic and locally incorporated companies in Germany and Saudi Arabia.

ELT Group also includes CY4GATE, specialised in Cyber Security and Cyber Intelligence; E4Life, Italy's first Biodetection company; and Solynx Corporation, a technology scouting company based in the United States.
